UNIQUE INTERACTIVE SEMINAR SHOWCASES LATEST IMAGING TECHNOLOGY

Charlotte, NC – (August 5, 2004)- A first of its kind highly interactive seminar on the latest issues and technology in professional imaging is set for August 19, 2004 in Charlotte. "The presentation is targeted to meet the interests and needs of office managers, IT managers, marketing managers, owners, presidents and CEO's," says organizer, Will Fisher of Charlotte Copy Data.

The seminar will include a non-PowerPoint presentation of how Canon's latest technology enables greater productivity in the workplace. Attendees will hear the latest information from top professionals in the imaging field, enhanced by 50" flat-screen plasma television with 6 channel surround sound (Provided by The Big Picture, LLC) which will serve to creatively demonstrate real world problems and solutions.

Topics covered during the interactive Demonstration modules:

- Copiers configured as network printers
- Desktop faxing
- Simple office color copiers
- High-end graphics intensive color copiers
- Wide-Format printers for poster creation
- Database document management systems
- Moving towards the paperless office
